Commissioner Kathleen Abernathy
445 12th Street SW
Washington, DC 20554

Commissioner Abernathy:

Dear FCC,

I believe that violence and immorality in television is getting worse each year and that it has contributed to our ever increasingly violent and immoral society.

I grew up in the sixties and seventies and while there were some violent shows on television then they were far fewer and far less graphic than they are today and immorality wasn't glamorized as it is today.

I firmly believe that violent images and violent speech along with acceptance of all kinds of immoral behavior desensitizes people over time. It also serves to devalue human life. It's like garbage in garbage out.

We already know that for those that enjoy and/or crave explicit material (violence, pornography, perversion) it always takes more and more graphic and more and more extreme to satisfy and it seems that there are those all too willing to keep pushing the envelope or just tossing it aside to provide that "high".

It is a fact that the majority of Americans watch a lot of television. I can only hope that your organization will step up and promote a higher standard in television by enforcing your current laws (if they are sufficient to deal with TV today) and issuing fines (at higher amounts) to those that break the law, no matter who they are.

If TV returns to programming that promotes decency, integrity, honesty, community, education and non-violence we might be amazed at the effect on our nation.

Thank you for your time.

Sincerely,

Laura K. Winchester

Commissioner Abernathy:

To whom it may concern,
Violence in the media is a big enough concern in my household that our family has taken steps to protect ourselves. We believe that much of the violence allowed in the media desensitizes us to that which we should be sensitive to. We have gone as far as to cut off 99% of mainstream media in our home. We run all forms of violent media through our own filter system as a protective measure for our family. Much of the freedom that the media takes to barrage families over the airwaves with 'over the top garbage' offends us. We also are convinced that we can see the effects of this very desensitization on our society.

Thankyou

Sincerely,

Tim Pritchard

As a professional who works with children every day for about 20 years now, I would like to add my comments on the effect on children of violent media images and messages. Children are becoming more and more violent toward each other as well as just in general terms. Our children are becoming less sympathetic as well as less caring. They are becoming hardened to suffering and pain of others. I find it amusing and pathetic that advertizing sells because we all understand that what we watch and hear affects our behavior, and yet so many would deny that fact as it relates to violence. What is happening in our schools is evidence enough. Our children act out what they have seen and then we are shocked, but why? Yes, the violence is affecting all of our lives negatively. It needs to be controlled.

I agree there is too much violence (and sexual perversion) on television. The words and images act as pollutants to people's minds and will find their outlets in actions of violence and perversion.

Why are there so many people incarcerated? Could their unlawful behavior have started with what was put in their minds or someone else's? Violence breeds violence!

Sincerely,

Sylvia Chapman
